

**LuxeCore**<sup>™</sup>

COMPOSITE FENCING SOLUTIONS BY FENCETRAC<sup>®</sup>

**Premium | Stylish | Long-Lasting**

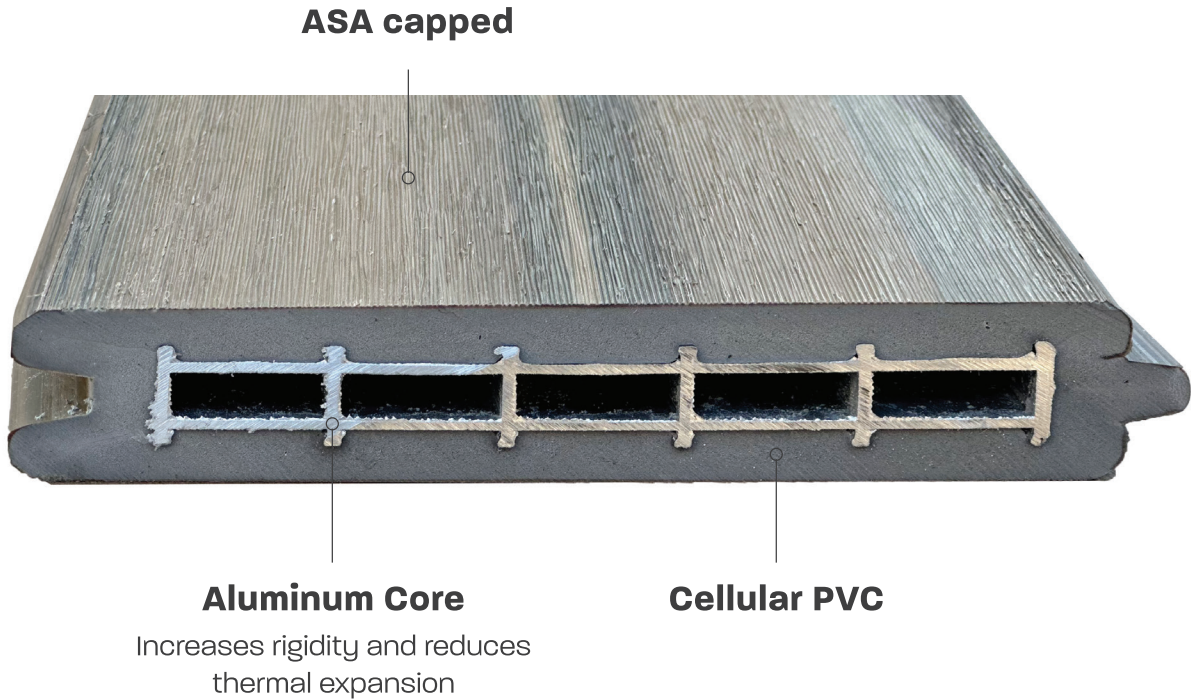

# Premium Composite Fencing

---

## About LuxeCore™

**LuxeCore™** is composed of a cellular PVC core encased in ASA (acrylic-styrene-acrylonitrile), a highly weather-resistant resin that provides more strength and resilience than most other resins. **LuxeCore™** is the best synthetic fencing material on the market and is competitively priced. The luxury finish, color and texture sets it apart from most traditional fencing solutions. The product is wood-free, but gives a natural wood look that resists fading, staining and scratching with a 20-year structural guarantee.

## Benefits of ASA Encased Composites

Due to its outstanding resistance to moisture, mold, mildew, rotting and resiliency, the ASA material is a preferred choice in the auto industry. As the next generation of premium composite fencing, **LuxeCore™** is encased by the best weather-resistant resin on the market making it fade and UV-resistant. The material's nonporous nature eliminates unwanted moisture and prevents warping unlike typical wood-based composites. **LuxeCore™** will not easily scratch or stain and will withstand harsh elements. **LuxeCore™** is a no maintenance product and requires only an occasional pressure wash to keep the fence looking great for years to come. **LuxeCore™** is available in four colors.

Item Specifications		Colors			
Board Length	6 ft	 Harbor Gray Tropical Teak Timber Brown Black Onyx			
Board Width	6 inches				
Board Thickness	1 inch				
Board Weight (approximate)	10 lbs				
Aluminum Core	6063- T5				
		<i>*Colors may appear slightly different on screen or printed than on actual product.</i>			

## The LuxeCore™ Difference

---

### **Fade Resistant**

Maintains its beauty season after season without the need for costly maintenance.

### **Water Resistant**

Because **LuxeCore™** doesn't absorb moisture, it is perfect for marine environments and high humidity.

### **Low-Maintenance**

No painting or sealing is required.

### **Easy to Clean**

Easily cleaned with mild soap and water and impervious to most common environmental contaminants.

### **Environmentally Friendly**

Cellular PVC material is recyclable, saving our precious forest resources from being depleted. In addition to being UV and water resistant, **LuxeCore™** does not require chemical treatments, making it safe for kids.
