

Benefits of ASA Encased Composites

Due to its outstanding resistance to moisture, mold, mildew, rotting and resiliency, the ASA material is a preferred choice in the auto industry. As the next generation of premium composite fencing, **LuxeCore™** is encased by the best weather-resistant resin on the market making it fade and UV-resistant. The material's nonporous nature eliminates unwanted moisture and prevents warping unlike typical wood-based composites. **LuxeCore™** will not easily scratch or stain and will withstand harsh elements. **LuxeCore™** is a no maintenance product and requires only an occasional pressure wash to keep the fence looking great for years to come. **LuxeCore™** is available in four colors.

Item Specifications		Colors			
Board Length	6 ft	 Harbor Gray  Tropical Teak  Timber Brown  Black Onyx			
Board Width	6 inches				
Board Thickness	1 inch				
Board Weight (approximate)	10 lbs				
Aluminum Core	6063- T5				
		*Colors may appear slightly different on screen or printed than on actual product.
